ABOUT COLLEGE

INNOVATIVE GROUP OF INSTITUTIONS

Innovative Welfare and Education Society (Regd.) duly registered under the Society Registration Act 1860 on 9th February, 2004 took upon itself the onerous task of spreading literacy in the rural and urban areas in India.

THE CHAIRMAN

A philanthropist by temperament, our Chairman Dr. K. R. Sharma is an eminent scholar, distinguished educationist, an erudite speaker and a perfect gentleman. He is research minded and is associated with many institutions of higher Education and organizations as an Expert member. His inner urge and fascination for academic pursuit drove him to join teaching profession and ultimately with in a very short span of time he became a very popular and esteemed teacher of Hindu College, a premier and reputed centre of academic excellence in University of Delhi. Dr. Sharma is a keen observer with clear vision and strong determination. He strongly believes in quality education, which can train students to meet challenges bravely in contemporary socioeconomic scenario. With this pious objective, he has established Innovative Group of Institutions in Greater Noida, which is gradually becoming intellectual capital of country. These institutions are having a galaxy of qualified and experienced teachers with superb infrastructure.

on
“ Pharmacovigilance
& Risk Management
Strategies in India”

Date: 3rd February 2018, Saturday

Organized By:

INNOVATIVE
COLLEGE OF PHARMACY

Venue:

Plot No.-6, Knowledge Park-2
Greater Noida
(Near India Expo Mart)

NATIONAL SEMINAR

on
**“ Pharmacovigilance
& Risk Management
Strategies in India”**

THEME OF THE SEMINAR

The field of Pharmacovigilance is growing rapidly and its development is making tremendous impacts in medical sciences and pharmaceuticals. Pharmacovigilance 2018 emphasizes on how its importance and significance can be gauged by the fact that it has made huge advancements over the course of time and is continuing to influence various sectors. The World Health Organization (WHO) defines pharmacovigilance as the science and activities relating to the detection, evaluation, understanding, and prevention of adverse reactions to medicines or any other medicine-related problems. The definition and scope of pharmacovigilance have evolved to recognize the importance of a systems approach for monitoring and improving the safe use of medicines. The amount and variety of safety-relevant data gathered from different patient populations in global clinical trials are enormous; therefore it is crucial that a concise and systematic approach to pharmacovigilance be implemented. Systematic safety monitoring is needed to identify previously recognized and unrecognized adverse drug reactions and to evaluate the safety and efficacy of medicinal products during clinical trials and in the post marketing period. Pharmacists have an important responsibility in monitoring the on-going safety of medicines as part of their professional practice. Pharmacists, role in pharmacovigilance varies from country to country, but the professional responsibility is the same regardless of jurisdiction. Pharmacists can create a trusted environment by counselling patients to reduce medication errors, improve safety and quality of health care.

INVITED SPEAKERS

Sh. S.L. Nasa : Registrar,
Delhi Pharmacy Council.
Dr. Zeenat Iqbal : Associate Professor,
Jamia Hamdard University.
